Current situation updated

The Health Protection Agency (HPA) today (Wed) informed the University of Exeter that ten of its students has tested positive for influenza A, H1N1 (also known as 'swine flu').

Most people in this country have been affected only mildly by the flu and this is the situation with the students in Exeter too, who are expected to make a full recovery following treatment.

Close contacts of the students are to be given antiviral drugs as a precaution and anyone reporting flu-like symptoms will be offered tests for swine flu.

The University has written to students to advise them of the current situation.

Following a risk assessment carried out by the HPA and Devon Primary Care Trust, the University has been advised that no other actions are necessary and the institution can remain open.

The University is working closely with the HPA and NHS colleagues to monitor the situation. Devon PCT and the HPA have established plans in place to deal with cases of swine flu, and the University has a Flu Pandemic Contingency Plan.

Main message:

CATCH IT: germs spread easily. Always carry tissues and use them to catch your cough or sneeze.

BIN IT: Germs can live for several hours on tissues. Dispose of them as soon as possible.

KILL IT: Hands can transfer germs to any surface you touch. Clean your hands as soon as you can."

Anyone experiencing flu-like symptoms is advised to contact NHS Direct on 0845 46 47 in the first instance.

Advice for GPs/healthcare staff

Flu response centres (FRCs) have been established to answer enquiries from health professionals regarding patients with flu-like illness and their contacts. To arrange patient assessment, samples, prophylaxis or to follow up contacts please call 0845 425 1754 (health professionals only). The line is open 8am-8pm only. At weekends or overnight please call any acute hospital in our patch and request to speak to the on-call public health professional.

General advice

We have transferred a great deal of general swine flu information to InfoPoint – the trust's internal website. You must have an InfoPoint username and password to view this. If you have mislaid these or wish to re-register, please contact howard.chapman@nhs.net
