## Alcohol and your mental health

## Did you know?

of us say we're regularly drinking above the recommended drinking guidelines of 14 units a week.

**Around** 

1 in 5

Overuse of alcohol can lead to

## low mood and anxiety

and can worsen the symptoms of other mental health problems.

mental health.

Taking
a break or

cutting down
on your drinking
can improve your

How
we're affected
can depend on:
what we're drinking,
how much we drink,
how long we drink
for and our
mental state.
